Ended Listing is "AUTOMATICALLY"

relisted to eBay?

1. Ended Listing is "AUTOMATICALLY" relisted to eBay?

Three scenarios for the ended listings to be relisted automatically:

1. The function of Keep One Active is turned to "Yes". For this case, you can find a record of Auto Relist in the Listing History.
2. From the listing schedule, the box of "Re-post one after another when ALL items in the profile are listed" is checked. For this case, you can find a record of Schedule in the Listing History.
3. The operator manually relists them onto eBay. For this case, you can find a record of Manual in the Listing History.

** If no listing record is found, it means that this relisting is not done through SoldEasy.
