Cannot link up a new eBay ID, why?

Cannot link up a new eBay ID, why?

I want to link up a new eBay ID, and tried linking several times, but the first API shows red "expired" status, and second shows green "linked", why?

When you are trying to link up a new eBay ID to SoldEazy, tried linking several times, but the first API show red "expired" status, and second shows green "linked", what should you do?

Shop Type	Account ID	Shop Initial	Shop Full Name	Status
eBay	[redacted]	[redacted]	[redacted]	Traditional API: Linked New API: Linked
eBay	[redacted]	[redacted]	[redacted]	Traditional API: Expired New API: Linked

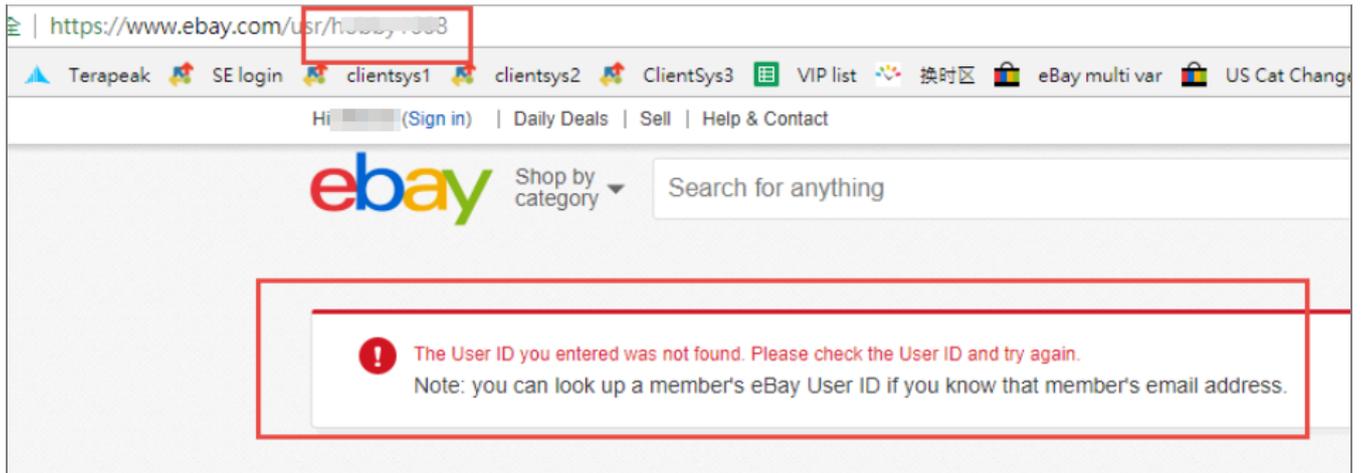

Answer:

This is because you misspelled your eBay account ID, please check your eBay ID before you try to link up account.

How to check whether I have entered wrong eBay ID:

copy the eBay ID you just entered, and open a new browser window, input the following URL:

[https://www.ebay.com/usr/\[your eBay ID here\]](https://www.ebay.com/usr/[your eBay ID here])

If the page says "The User ID you entered was not found. Please check the User ID and try again", then you will know that the eBay ID is 100% invalid.
