My listing is associated a fitment table, now it's gone, what happened?

[??ID??: 515 | ??: ???? | ?????: Mon, Sep 24, 2018 3:29 PM

My listing is associated a fitment table,

now it's gone, what happened?

1. How did this happen?

eBay updates its motor parts fitment info from time to time, so it's possible that valid motor parts fitment records suddenly become invalid

It does not matter if seller is using a fitment table created by his/her own or if the seller imported a table from other sellers existing listing, all fitment tables may become invalid

2. How to deal with this situation?If the records in a fitment table are all or partially invalid, you can choose to

- 1. create a new fitment table manually in SoldEazy
- 2. revise your old fitment table
- 3. import another valid fitment table from others' listing

1 & 2 require manual work, while 3 requires a fitment table which contains no invalid records.

**Before importing fitment tables from others' listing, you can verify if the fitment table is valid or not? First click "show all compatible vehicles" to expand all compatibilities
