Introduction of Order Discount functions and usage

- 1. Function Introduction
- 2. How to use it

1. Function Introduction

Generally, order discount also called order discount function or order promotion function. It is a discount based on the order size or the amount spent by a buyer. The discount function can separate as four categories? Spend/Quantity/Buy one, get one/No

minimum purchase

'Spend' is a type of cashback promotion. It includes the following three situations? 1) Buy a specific amount and get a specific amount reduction; 2) Buy a specific amount and get a specific percentage discount; 3) If you buy a specific amount, and attain the particular level, you can receive a specific amount reduction

'Quantity' is another type of cashback promotion. It includes the following three situations ?1) Buy a specific quantity and get a specific amount reduction; 2) Buy a specific quantity and get a specific percentage discount; 3) If you buy a specific quantity, and attain the particular level, you can receive a specific amount reduction

'Buy one, get one' is a type of discount. It includes the following four situations ?1) Buy one get one free; 2) Buy one get a percentage of discount for another one; 3) Buy one get one free (Only can use once for each order); 4) Buy one get a percentage of discount for another one (Only can use once for each order).

No minimum purchase promotion includes the following three situations? 1)
Buy one or more can save a specific amount; 2) Enjoy a specific percentage of discount; 3) Singal product provides a specific amount discount. The buyer can choose a suitable promotion according to their needs.

Let's use Spend to be an example.

We can choose Save\$10 when you spend \$100. This means that when the buyer purchases such products at a time of 100 USD, he/she can enjoy the 10 USD reduction immediately.
