The reason for this problem is that the text content is too long and cause the displayed content incomplete, the solution as follows:

1. Open the ' Text Description 01 ' and click the ' Source Code ' on the upper left

corner of the text edit box

2. Open the source code and find the "table" in the table part inside

3. Add word-wrap: break-word; word-break: break-all to the style=" behind the table;

Click <Save> and done!
