## 2) Create a private app for linking up use

In the left menu, check you are in the " My Apps & Credentials " tab and scroll down to the " REST API apps " section. Click " Create App ":

The screenshot shows the PayPal Developer dashboard. The left sidebar has a blue header with 'DASHBOARD' and several tabs: 'My Apps & Credentials' (highlighted with a red box), 'My Account', 'SANDBOX' (with 'Accounts' and 'Notifications' sub-options), 'MOCK' (with 'Webhooks Simulator', 'Credit Card Generator', and 'Negative Testing' sub-options), and 'API Calls'. The main content area has a white header with 'REST API apps' (highlighted with a red box). Below it is a sub-header: 'Create an app to receive REST API credentials for testing and live transactions.' A note in a box says: 'Note: Features available for live transactions are listed in your [account eligibility](#)'. At the bottom is a blue 'Create App' button (highlighted with a red box).

Enter a name for your application, then click on "Create app" (do not touch the box "Sandbox developer account", it is an e-mail address created automatically by Paypal to allow you to access a test space, but you'll only need it for the app validation email, as explained below):

The screenshot shows the 'Create New App' page. The left sidebar has a blue header with 'DASHBOARD' and several tabs: 'My Apps & Credentials' (highlighted with a red box), 'My Account', 'SANDBOX' (with 'Accounts' and 'Notifications' sub-options), 'MOCK' (with 'Webhooks Simulator', 'Credit Card Generator', and 'Negative Testing' sub-options), and 'API Calls'. The main content area has a white header with 'Create New App'. Below it is a sub-header: 'Create an app to receive REST API credentials for testing and live transactions.' A section titled 'Application Details' has an 'App Name' field containing 'SoldEazy app' (highlighted with a red box). A 'Sandbox developer account' field contains a blurred email address with a red arrow pointing to it and the text 'Do not touch'. A note below says: 'As a reminder, all apps created under your account should be related to your business and the type of business it conducts.' At the bottom is a blue 'Create App' button (highlighted with a red box).

Once the button "Create App" clicked you arrive on a test space (sandbox).

ATTENTION: first of all, it is imperative that you click on the " **LIVE** " button at the top right in order to move on the app publication area, otherwise it will not work on your website:

First of all, click the "Live" button

SoldEazy app

App display name: SoldEazy app

LIVE API CREDENTIALS

Note that not all features are available for live transactions. Features available for live transactions are listed in your **account eligibility**.

Scroll down to the LIVE APP SETTINGS part and grant these access rights to SoldEazy, especially the last one.

#### App feature options

- Accept payments** Enable one-time and subscription payments. [Advanced options](#)
- Invoicing** Issue invoices for payments owed, manage partial balances due, and enable custom net payment terms.
- Payouts** Send batch payments to multiple PayPal accounts at once. You can vary the amount by recipient and select if you'd like it delivered by phone number or email.
- Customer Disputes** Use the PayPal [Disputes API](#) to list disputes, provide evidence, accept claims, show dispute details, and appeal disputes.
- PayPal Here** Process swiped/card-present card transactions.
- Log in with PayPal** Identity service that enables your customers to login with their PayPal login.
- Transaction Search** Access your PayPal transaction history.

\* If the save button does not turn blue after you check the boxes, please try unchecking then re-checking these boxes, then you will be able to save the settings.

\* Also the change on settings needs some time before they take effect, please wait for some time.

### 3) Input your private app token in SoldEazy

Click "Show" button under Client ID

# SoldEazy app

## 2. Frequently Asked Questions

I.

Q: I have logged in the developer page, but I can not create Live credentials, PayPal asks me to "Upgrade account", what happened?

## My apps & credentials

[Sandbox](#)

[Live](#)

Your current account is limited. In order to process live transactions, we'll need some more information from you. [Upgrade account](#)

A: This is because your account is a personal account, but not a business account, only business accounts can create credentials for Live mode.

# My Account

Current account type: Personal

You may need to provide additional information to access some PayPal features.

Capabilities	Developer Account	Personal Account	Business Account
<b>Access to Sandbox</b> Integrate and test code in PayPal's testing environment	✓	✓	✓
<b>Move money</b> Shop online or send and receive personal payments		✓	✓
<b>Go live</b> Manage live apps and process live transactions			✓

[Upgrade](#)
