  1. Register PayPal developer account
  2. Create a private app for linking up use
  3. Input your private app token in SoldEazy
2. Frequently Asked Questions

\* Only available for business PayPal accounts.

## 1. Link up PayPal account

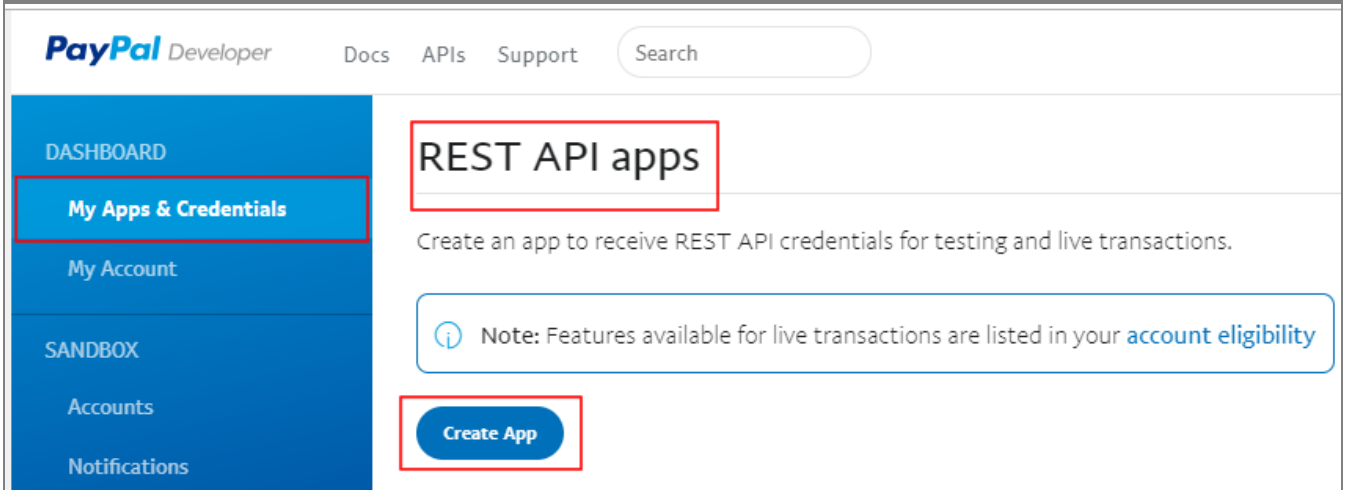

### 1) Register PayPal developer account

Go to <https://developer.paypal.com> and click on " Log into Dashboard ".

The screenshot shows the PayPal Developer dashboard. At the top, there is a navigation bar with the PayPal Developer logo, links for Docs, APIs, and Support, and a search bar. On the right side of the navigation bar, there is a blue button labeled "Log into Dashboard" with a red arrow pointing to it. Below the navigation bar, the main content area has a blue background with the heading "Explore our payment products and solutions". There are six white boxes arranged in a 2x3 grid, each representing a different payment product: Checkout, PayPal Commerce Platform, Subscriptions, Payouts, Invoicing, and Accept card payments. Each box contains a brief description of the product. At the bottom of the main content area, there is a section titled "Get the Smart Payment Buttons code" with a yellow button for "PayPal" and a blue button for "PayPal CREDIT". Below these buttons are logos for VISA, Mastercard, AMEX, and DISCOVER. At the very bottom, there is a small text "Powered by PayPal".

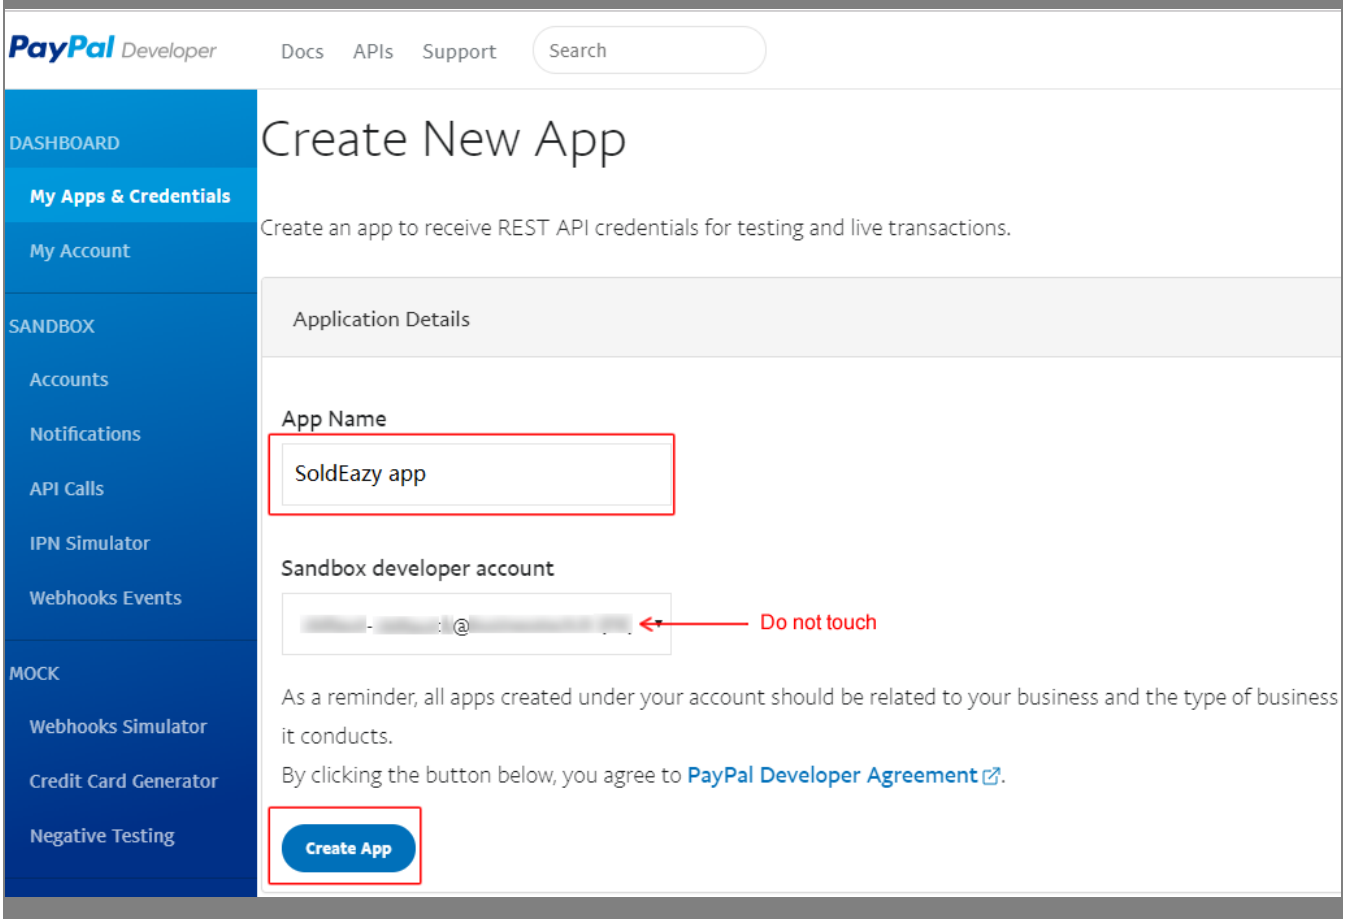

## 2) Create a private app for linking up use

In the left menu, check you are in the " My Apps & Credentials " tab and scroll down to the " REST API apps " section. Click " Create App ":

The screenshot shows the PayPal Developer dashboard. The left sidebar has a blue background with white text. The 'My Apps & Credentials' menu item is highlighted with a red box. The main content area has a white background. At the top, there is a search bar and navigation links for 'Docs', 'APIs', and 'Support'. Below the search bar, the heading 'REST API apps' is highlighted with a red box. Underneath, there is a sub-heading 'Create an app to receive REST API credentials for testing and live transactions.' and a blue box containing a note: 'Note: Features available for live transactions are listed in your account eligibility'. At the bottom of the main content area, a blue 'Create App' button is highlighted with a red box.

Enter a name for your application, then click on "Create app" (do not touch the box "Sandbox developer account", it is an e-mail address created automatically by Paypal to allow you to access a test space, but you'll only need it for the app validation email, as explained below):

The screenshot shows the 'Create New App' page on the PayPal Developer dashboard. The left sidebar is the same as in the previous screenshot. The main content area has a white background. At the top, there is a search bar and navigation links for 'Docs', 'APIs', and 'Support'. Below the search bar, the heading 'Create New App' is displayed. Underneath, there is a sub-heading 'Create an app to receive REST API credentials for testing and live transactions.' and a section titled 'Application Details'. In this section, there is a form with two fields: 'App Name' and 'Sandbox developer account'. The 'App Name' field contains the text 'SoldEazy app' and is highlighted with a red box. The 'Sandbox developer account' field contains a partially obscured email address and is highlighted with a red box. A red arrow points to the email address with the text 'Do not touch'. Below the form, there is a blue 'Create App' button highlighted with a red box. At the bottom of the page, there is a reminder: 'As a reminder, all apps created under your account should be related to your business and the type of business it conducts.' and a link to the 'PayPal Developer Agreement'.

Once the button "Create App" clicked you arrive on a test space (sandbox).

ATTENTION: first of all, it is imperative that you click on the " **LIVE** " button at the top right in order to move on the app publication area, otherwise it will not work on your website:

First of all, click the "Live" button

## SoldEazy app

App display name: **SoldEazy app** 

**LIVE API CREDENTIALS**

Note that not all features are available for live transactions. Features available for live transactions are listed in your **account eligibility**.

Scroll down to the LIVE APP SETTINGS part and grant these access rights to SoldEazy, especially the last one.

### App feature options

- Accept payments** Enable one-time and subscription payments. [Advanced options](#)
- Invoicing** Issue invoices for payments owed, manage partial balances due, and enable custom net payment terms.
- Payouts** Send batch payments to multiple PayPal accounts at once. You can vary the amount by recipient and select if you'd like it delivered by phone number or email.
- Customer Disputes** Use the PayPal Disputes API to list disputes, provide evidence, accept claims, show dispute details, and appeal disputes.
- PayPal Here** Process swiped/card-present card transactions.
- Log in with PayPal** Identity service that enables your customers to login with their PayPal login.
- Transaction Search** Access your PayPal transaction history.

\* If the save button does not turn blue after you check the boxes, please try unchecking then re-checking these boxes, then you will be able to save the settings.

\* Also the change on settings needs some time before they take effect, please wait for some time.

### 3) Input your private app token in SoldEazy

Click "Show" button under Client ID

## 2. Frequently Asked Questions

I.

Q: I have logged in the developer page, but I can not create Live credentials, PayPal asks me to "Upgrade account", what happened?

## My apps & credentials

Sandbox

**Live**

 Your current account is limited. In order to process live transactions, we'll need some more information from you. [Upgrade account](#) 

A: This is because your account is a personal account, but not a business account, only business accounts can create credentials for Live mode.

# My Account

Current account type: Personal

You may need to provide additional information to access some PayPal features.

Capabilities	Developer Account	Personal Account	Business Account
<b>Access to Sandbox</b> Integrate and test code in PayPal's testing environment	✓	✓	✓
<b>Move money</b> Shop online or send and receive personal payments		✓	✓
<b>Go live</b> Manage live apps and process live transactions			✓
			<a href="#">Upgrade</a>
