

# Link up Shopify in SoldEazy

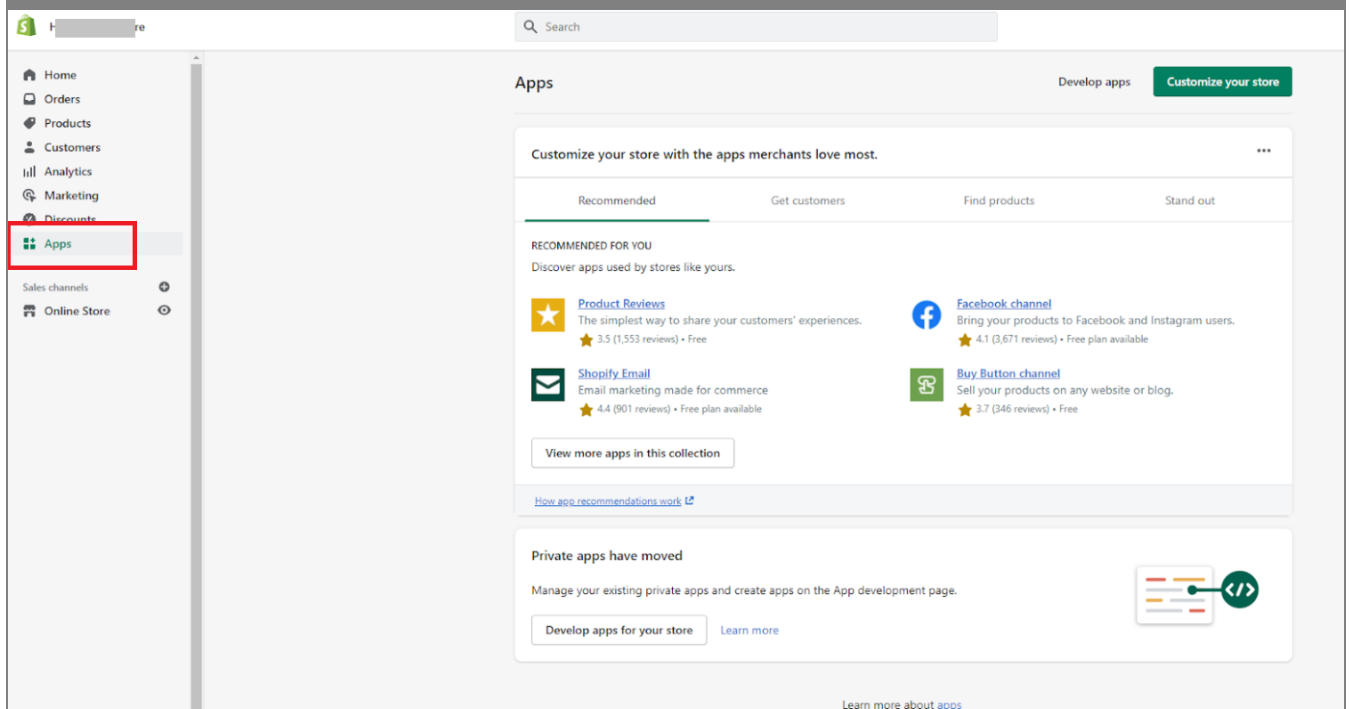

917 | 917 | 917: Mon, Dec 18, 2023 10:20 AM

## Link up Shopify in SoldEazy

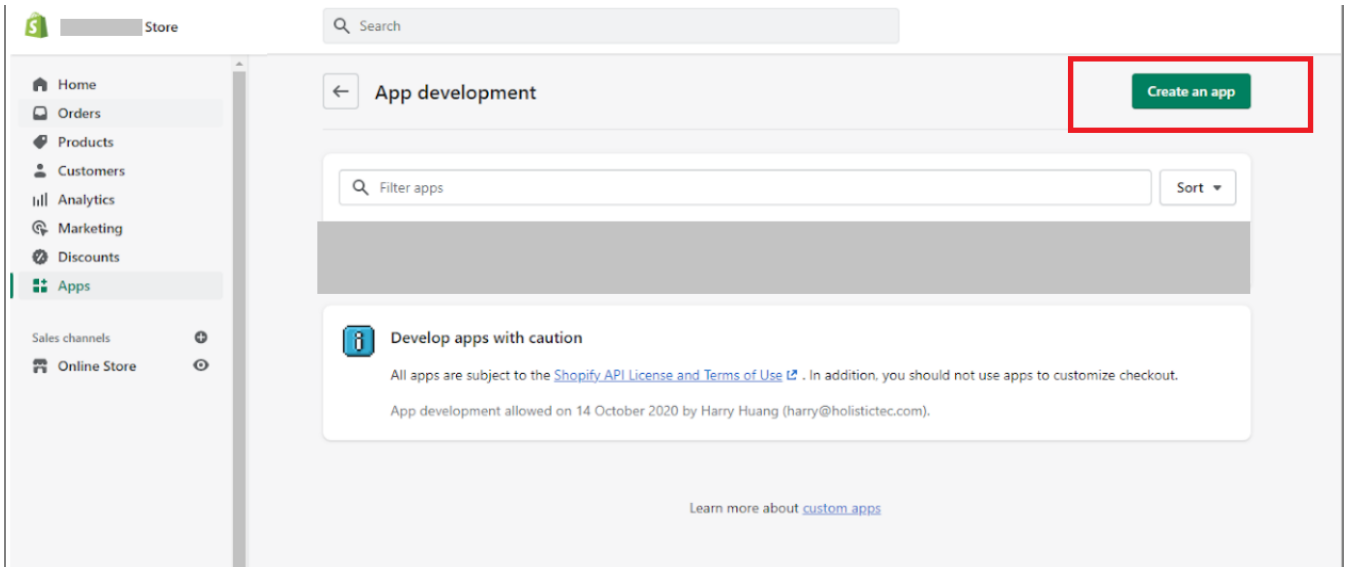

1. Create a private app in Shopify
2. Link up your Shopify app to SoldEazy
3. Clone your eBay listing to Shopify

### 1. Create a private app in Shopify

Log in to your Shopify backend, click " Apps " in the left menu

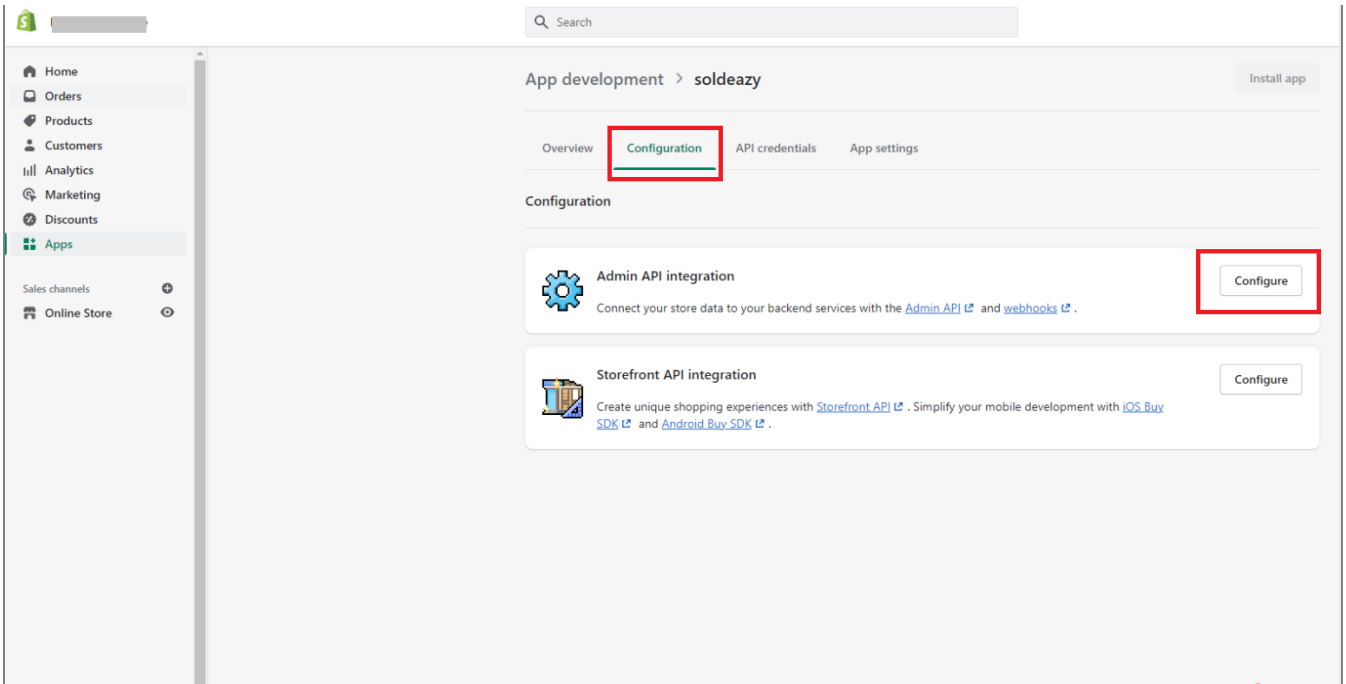

Click " Create an app " and name your app

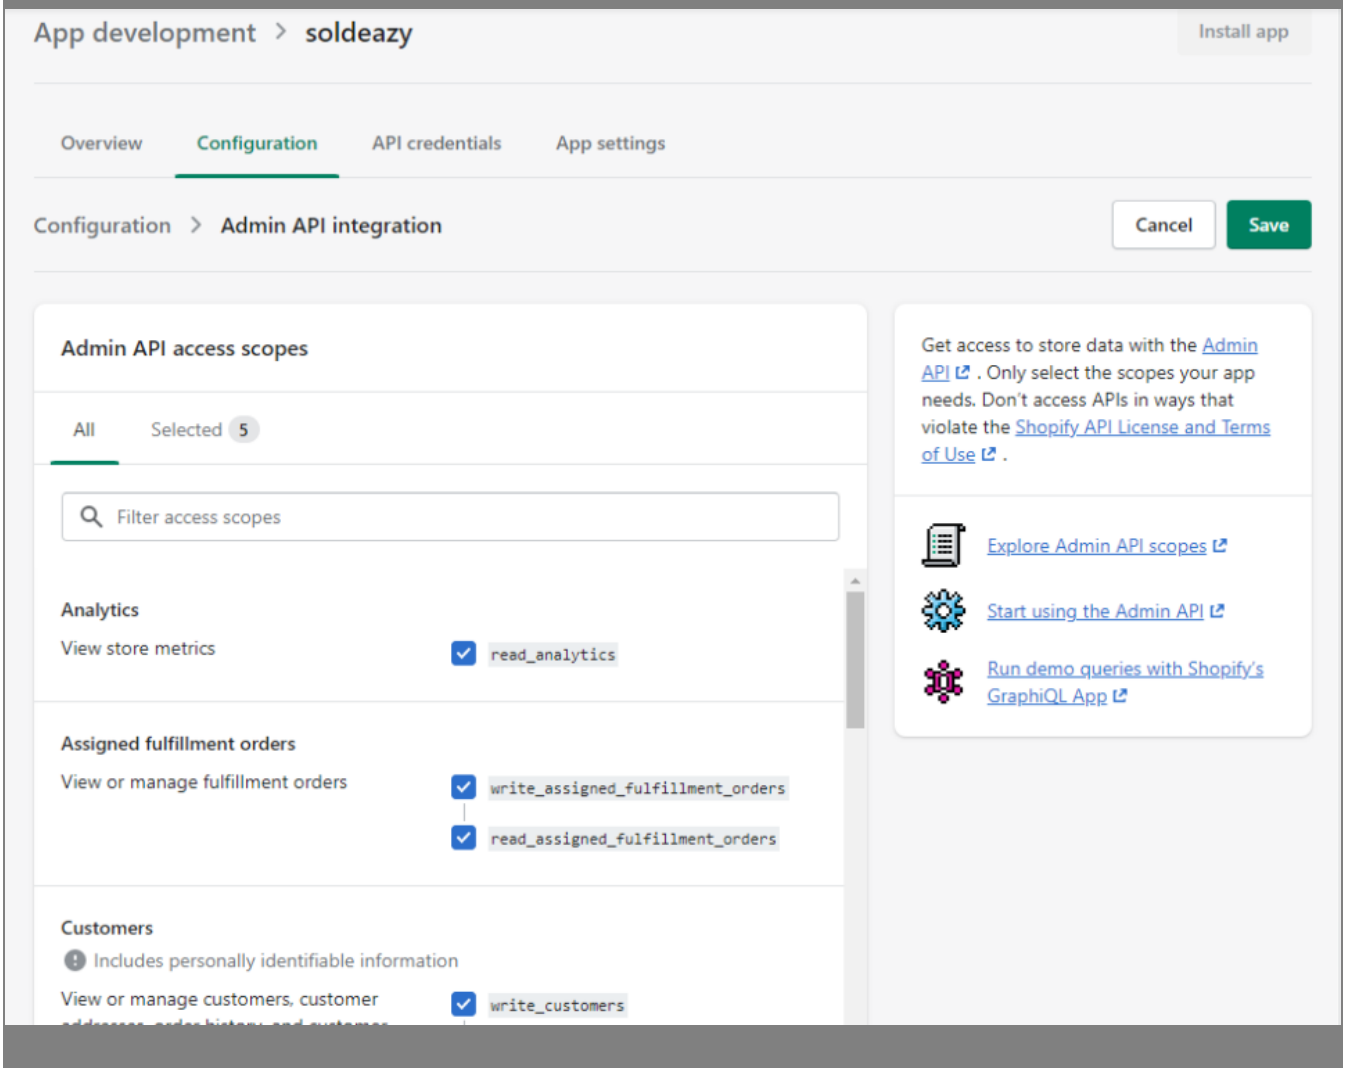

The 'Create an app' modal is shown. It has a title 'Create an app' and a close button (X) in the top right. The 'App name' field contains the text 'soldeazy'. The 'App developer' field shows a user profile with a name and email address. Below the fields, there is a note: 'Can only be assigned to staff and collaborators with permission to develop apps. We'll contact them about development updates, like changes to Shopify APIs. Apps are subject to the [Shopify API License and Terms of Use](#).' At the bottom, there are two buttons: 'Cancel' and 'Create app'.

Go to **Configuration** tab, click “ **Configure** ” in “ **Admin API integration** ” section.

Check all Admin API access scopes and save.

Go to **API credentials** tab, click “ **Install app** ”.

The screenshot shows the 'API credentials' tab for an app named 'soldeazy'. At the top right, there is a green 'Install app' button. Below the app name, there are four tabs: 'Overview', 'Configuration', 'API credentials' (which is selected and underlined), and 'App settings'. The main content area is titled 'API credentials' and contains two main sections. The first section is 'Access tokens', which states 'You don't have any access tokens yet. To get your Admin API access token, install your app.' Below this text is a green 'Install app' button, which is highlighted with a red rectangular box. To the right of this section is a warning box that says 'Keep your access tokens secure. Only share them with developers that you trust to safely access your data.' Below the warning are three links: 'Authenticate with access tokens' (with a gold coin icon), 'Start using the Admin API' (with a gear icon), and 'Start using the Storefront API' (with a storefront icon). The second section is 'API key and secret key', which contains two input fields. The first is 'API key' with a value starting with 'e...' and a copy icon. The second is 'API secret key' with a value of dots and a copy icon. Below these fields is the text 'Created 21 Feb 2022 at 08:31 UTC'. To the right of this section is a note that says 'Use your client secret to [verify incoming webhooks](#)'.

Go to **API key and secret key** , copy " **API key** " & " **API secret key** ".

App development > soldeazy Installed Uninstall app

Overview Configuration **API credentials** App settings

### API credentials

**Admin API access token** New

Use your access token to request data from the [Admin API](#) .

⚠ To protect your data, you'll only be able to reveal your Admin API token once. Copy and save your Admin API access token in a secure place.

..... Reveal token once

Created 21 Feb 2022 at 08:33 UTC

Keep your access tokens secure. Only share them with developers that you trust to safely access your data.

- [Authenticate with access tokens](#)
- [Start using the Admin API](#)
- [Start using the Storefront API](#)

**API key and secret key**

API key

API secret key

Created 21 Feb 2022 at 08:31 UTC

Use your client secret to [verify incoming webhooks](#) .

Then go to SoldEazy.

2. Link up your Shopify app to SoldEazy

Log in to SoldEazy, go to **Channels > Sales Channel**

**CHANNELS**

- Sales Channel**
- Payment Channel

Click < **Add an account** >

Sourcing

Distribution

[Add an account +](#) | [Help](#)

Choose < **Shopify** >

Channel Account Type

Input your Shopify **store URL** and **credentials** , click save

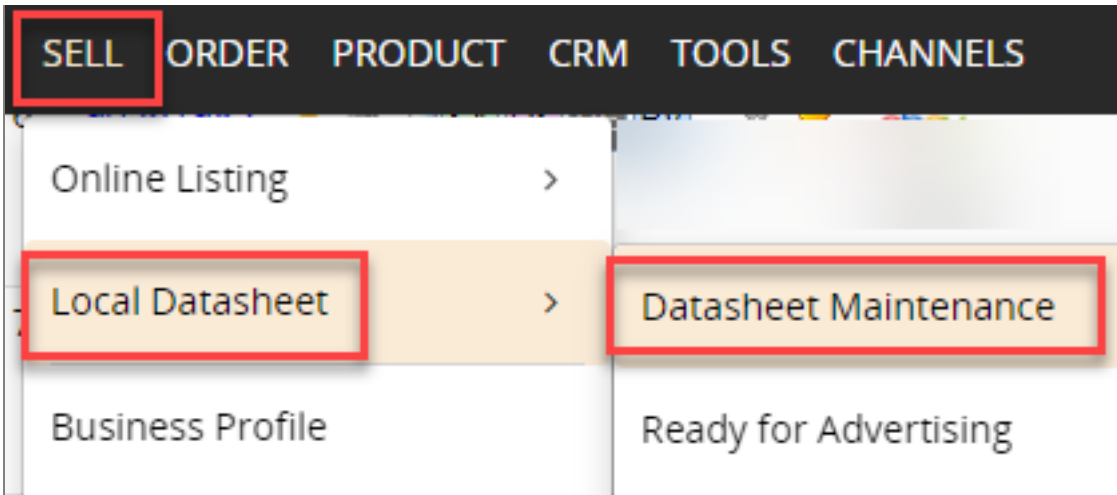

Field Name	Field Value
Store URL	<input type="text"/>
e.g. https://my-os.myshopify.com	
Admin API access token	<input type="text"/>
API key	<input type="text"/>
API secret Key	<input type="text"/>

[Save](#) [Back](#)

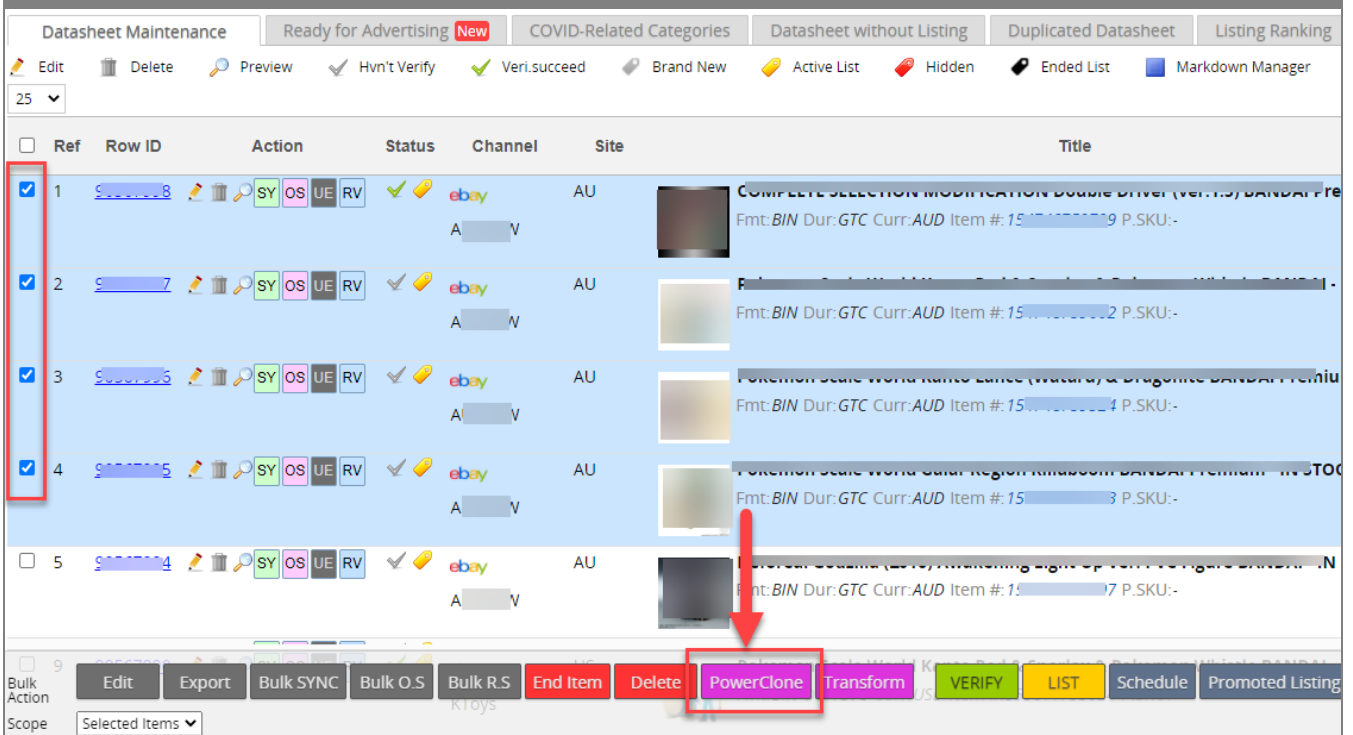

Linking up process is now completed, you can start Shopify operation in SoldEazy now.

3. Clone your eBay listing to Shopify

Go to SELL > Local Datasheet > Datasheet Maintenance

Select existing eBay datasheets that you want to clone to Shopify, click <PowerClone> button in the bulk action buttons

Select "Clone to Shopify" in <PowerClone Type>, then select the Shopify account that you want to clone to, then confirm OK

### PowerClone Options

PowerClone Type	<input type="text" value="Clone to Shopify"/>	
*Account	<input checked="" type="checkbox"/> Shopify (Shopify)	
Price	<input type="text" value="Change %"/>	
Datasheet Tag	<input type="text"/>	
Shop Category	<input type="text" value="Auto Mapping"/>	
Add Edit Field	<input type="text"/>	
Quick PowerClone Settings	<a href="#">→ eBay Corridor Expansion</a>	

\*Up to 200 datasheets can be cloned.  
\*Mandatory field cannot be empty.  
**\*Please click the "X" icon in the above field(s) if no change is needed. Otherwise, "Empty" value would be applied to the new cloned records.**

Usually the cloned datasheets will appear on top of new datasheets immediately, if not, please re-enter datasheet maintenance page.

Go to the newly cloned datasheets, click pencil button to edit contents

Ref	Row ID	Action	Status	Channel	Site	Title
<input type="checkbox"/>	1				US	Pol... Fmt:BIN Dur:GTC Curr:AUD Item #-: P.SKU:-

If everything is OK, click <Save and Verify>, changes will be saved, and the system will verify if the contents are OK for listing to Shopify
