Link up PayPal account

1. Link up PayPal account
 1. Register PayPal developer account
 2. Create a private app for linking up use
 3. Input your private app token in SoldEazy
2. Frequently Asked Questions

* Only available for business PayPal accounts.

1. Link up PayPal account

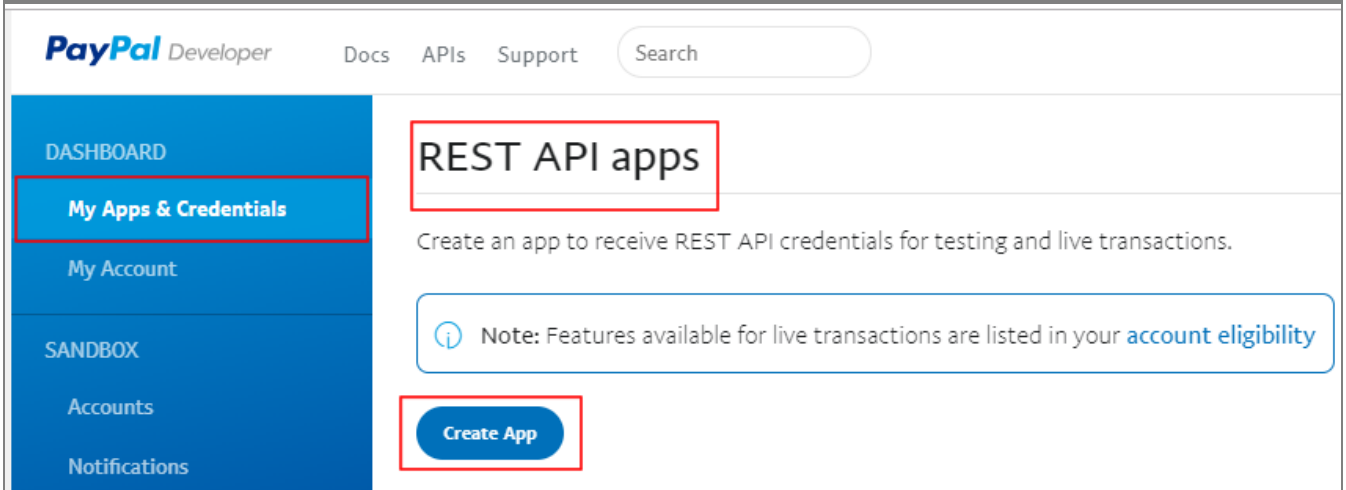

1) Register PayPal developer account

Go to <https://developer.paypal.com> and click on " Log into Dashboard ".

The screenshot shows the PayPal Developer dashboard. At the top, there is a navigation bar with 'PayPal Developer', 'Docs', 'APIs', 'Support', and a search box. A red arrow points to the 'Log into Dashboard' button in the top right corner. Below the navigation bar, the main content area has a blue header with the text 'Explore our payment products and solutions'. Underneath, there are six cards representing different services: Checkout, PayPal Commerce Platform, Subscriptions, Payouts, Invoicing, and Accept card payments. Each card has a brief description. At the bottom of the dashboard, there is a section titled 'Get the Smart Payment Buttons code' with logos for PayPal, PayPal CREDIT, VISA, Mastercard, AMEX, and DISCOVER. A 'FEEDBACK' button is visible on the right side of the dashboard.

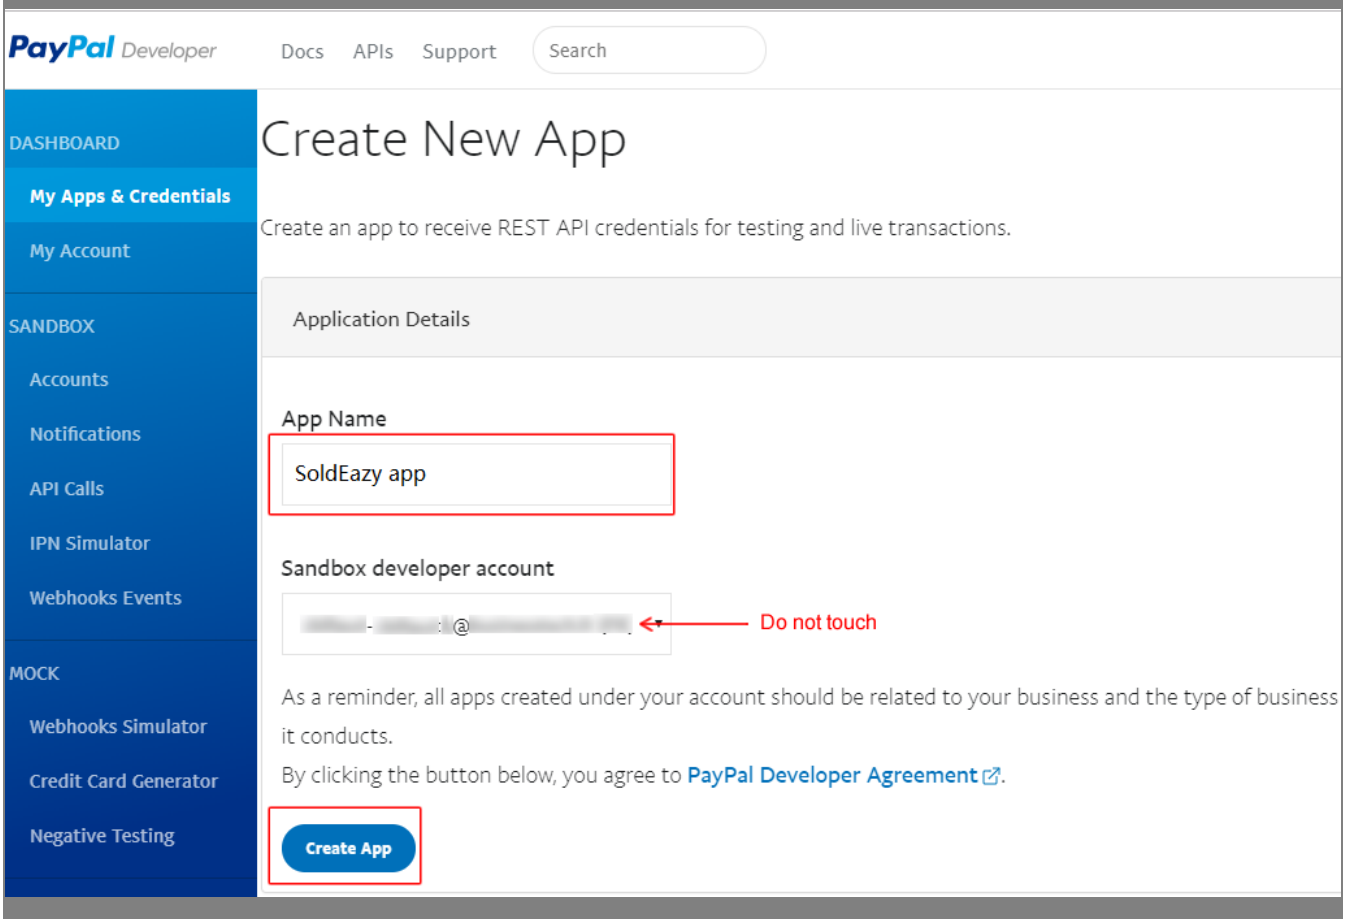

2) Create a private app for linking up use

In the left menu, check you are in the " My Apps & Credentials " tab and scroll down to the " REST API apps " section. Click " Create App ":

The screenshot shows the PayPal Developer REST API apps page. The left sidebar is blue with the following menu items: DASHBOARD, My Apps & Credentials (highlighted with a red box), My Account, SANDBOX, Accounts, and Notifications. The main content area has a white background with the following elements: a search bar, a red box around the heading "REST API apps", a sub-heading "Create an app to receive REST API credentials for testing and live transactions.", a blue note box with an information icon and the text "Note: Features available for live transactions are listed in your [account eligibility](#)", and a blue "Create App" button (highlighted with a red box).

Enter a name for your application, then click on "Create app" (do not touch the box "Sandbox developer account", it is an e-mail address created automatically by Paypal to allow you to access a test space, but you'll only need it for the app validation email, as explained below):

The screenshot shows the "Create New App" page on the PayPal Developer site. The left sidebar is blue with the following menu items: DASHBOARD, My Apps & Credentials (highlighted with a red box), My Account, SANDBOX, Accounts, Notifications, API Calls, IPN Simulator, Webhooks Events, MOCK, Webhooks Simulator, Credit Card Generator, and Negative Testing. The main content area has a white background with the following elements: a search bar, the heading "Create New App", a sub-heading "Create an app to receive REST API credentials for testing and live transactions.", a section titled "Application Details" containing a form with the following fields: "App Name" (containing "SoldEazy app" and highlighted with a red box), "Sandbox developer account" (containing a masked email address and highlighted with a red box and a red arrow pointing to it with the text "Do not touch"), and a blue "Create App" button (highlighted with a red box). Below the form, there is a reminder: "As a reminder, all apps created under your account should be related to your business and the type of business it conducts." and a note: "By clicking the button below, you agree to [PayPal Developer Agreement](#)."

Once the button "Create App" clicked you arrive on a test space (sandbox).

ATTENTION: first of all, it is imperative that you click on the " **LIVE** " button at the top right in order to move on the app publication area, otherwise it will not work on your website:

First of all, click the "Live" button

SoldEazy app

App display name: **SoldEazy app** 

LIVE API CREDENTIALS

Note that not all features are available for live transactions. Features available for live transactions are listed in your **account eligibility**.

Scroll down to the LIVE APP SETTINGS part and grant these access rights to SoldEazy, especially the last one.

App feature options

- Accept payments** Enable one-time and subscription payments. [Advanced options](#)
- Invoicing** Issue invoices for payments owed, manage partial balances due, and enable custom net payment terms.
- Payouts** Send batch payments to multiple PayPal accounts at once. You can vary the amount by recipient and select if you'd like it delivered by phone number or email.
- Customer Disputes** Use the PayPal Disputes API to list disputes, provide evidence, accept claims, show dispute details, and appeal disputes.
- PayPal Here** Process swiped/card-present card transactions.
- Log in with PayPal** Identity service that enables your customers to login with their PayPal login.
- Transaction Search** Access your PayPal transaction history.

* If the save button does not turn blue after you check the boxes, please try unchecking then re-checking these boxes, then you will be able to save the settings.

* Also the change on settings needs some time before they take effect, please wait for some time.

3) Input your private app token in SoldEazy

Click "Show" button under Client ID

2. Frequently Asked Questions

I.

Q: I have logged in the developer page, but I can not create Live credentials, PayPal asks me to "Upgrade account", what happened?

My apps & credentials

Sandbox

Live

 Your current account is limited. In order to process live transactions, we'll need some more information from you. [Upgrade account](#) 

A: This is because your account is a personal account, but not a business account, only business accounts can create credentials for Live mode.

My Account

Current account type: Personal

You may need to provide additional information to access some PayPal features.
